PLO p3
Normal
Student t3
1,000 real orderings
b NLHE 6-max p2, blocks in their real order
confidence sequence extends beyond ±60 before ~1k blocks
confidence sequence (valid at every look)
ordinary 95% CI (valid at one look)
running estimate
one look at all 250k blocks: +1.28 [+0.43, +2.13]
confidence sequence at 250k: [−0.06, +2.61]
last 220k blocks (zoom)
naive peeking stops at block 204:
−27.9 BB/100 [−54.0, −1.8]
declares the wrong agent better
estimated edge of neutral over tight (BB/100)
